

MOUSEPADS

KABUTO L

DESCRIPTION

Thanks to the micro-woven material, the surface will feel more smooth than anything you've tried so far. Add to that a non-slip rubber base and stitched edges, and you have Kabuto, a mousepad for even the most demanding players.

KEY FEATURES

- The cellular rubber base ensures your mouse is the only thing that moves on the table. The 2mm thickness provides stability and accuracy of mouse movements.
- Kabuto's stitched edges prevent the surface finish from peeling off, rounding the powerful all-black look.
- The ultra-soft surface will make your mouse glide on it, increasing your agility and precision.
