The Weight Of The **0.18 kg**

EAN **5906453157016**

### Description

**KINETIK DOORBELL MT5701** is battery-free doorbell with wireless button. The button must be mounted in a visible position at the door or gate (range up to 150m).

The bell (in-door unit) should be placed in the electric socket.

Installation is very easy and quick!

You don't need any cables or batteries anymore!

Normal wireless doorbells are using batteries which needs to be replaced regularly. Our Wireless Kinetic Doorbell converts the pushing force into electricity.

The button housing has an IP44 standard, it can be used outdoor.
