Support the new MacBook

USB TYPE-C

USB 3.1 GEN 1

Mobile Storage for Android Devices

JetFlash® 890

Meeting the new generation of USB Type-C technology, the JetFlash 890 USB 3.1 OTG Flash Drive features a dual connector - a reversible USB Type-C connector and a regular USB 3.1 (Gen 1) connector - that is designed to transfer and back up your photos, music and videos between the latest USB Type-C port equipped devices such as MacBook and your PC, laptops and Mac computers.

Dual USB connector, double convenience

Thanks to the USB OTG (On-The-Go) technology, the JetFlash 890 combines a regular USB 3.1 Gen 1 connector and a USB Type-C connector into a USB flash drive, providing you greater portability to transfer precious photos, music, videos and any other digital files between tablets, smartphones, Mac computers, PCs and laptops.

Either way is connected with USB Type-C

It could be a real hassle trying to get the right side connected to the USB port, but this is no longer the case now. Featuring a reversible design, the JetFlash 890's USB Type-C connector saves not only the efforts to try twice or three times before actually connecting to the USB port, but also your time on data transfer with one-time plug-in.

USB Type-C connector

USB 3.1 Gen 1 connector

Get extra space with up to 128GB capacity

With up to 128GB capacity and the Type-C USB OTG port, you can effortlessly expand the storage capacities of your mobile devices. "Memory Full" message will not ruin your important moment anymore.

Mobile Storage for Android Devices

JetFlash® 890

Features
